DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Species I, directed to a method for detecting blood loss (claims 1-6)

Species II, directed to a method for detecting septic condition (claims 7-9)

Species III, directed to a method for detecting cardiogenic shock (claims 10-11)

Species IV, directed to a method for detecting a neonatal health condition (claims 12-15)

Species V, directed to a method for detecting limb ischemia (claims 16-21)

Species VI, directed to a method for optimizing balloon pump performance (claims 22-23)

Species VII, directed to a method for detecting peripheral vascular disease (claims 24-27)

Species VIII, directed to a method for detecting congestive heart failure (claims 28-31)

Species IX, directed to a method for evaluating a vasoactive medication (claims 32-33)

Species X, directed to a method for detecting syncope (claims 34-36)

Art Unit: 3735

Species XI, directed to a method for detecting tissue fluid content abnormality (claims 37-41)

Species XII, directed to a method for detecting deep vein thrombosis (claims 42-43)

Species XIII, directed to a method for detecting thermal injuries (claims 44-47)

Species XIV, directed to a method for detecting vascular instability (claim 48)

Species XV, directed to a method for determining the effect of radial artery resection (claim 49)

Species XVI, directed to a method for detecting cardiac output change (claim 50)

Species XVII, directed to a method for determining a hypertension cause (claims 51-52)

Species XVIII, directed to a method for determining change in muscle flow capacity (claims 53-55)

2. The species are independent or distinct because they measure different physiological parameters.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

Art Unit: 3735

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen E. Toth whose telephone number is 571-272-6824. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor, II can be reached on 571-272-4730. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
